

RAHUL JADHAV

SUMMARY

With over **15.6** years of experience as a Technical Lead, I am proficient in **.NET, REST API, Agentic Workflows, AI Agent, React, Microservices, Azure services, and SQL**. I have a deep understanding of web cloud architecture and possess strong design and development skills. My practical experience with various Azure PaaS services, coupled with client management, mentoring, team leadership, and technical project management using Agile methodology, distinguishes me in the field.

EXPERIENCE

Project Lead, 05/2022 - Current
TATA Consultancy Services - Mumbai, India

- Served as project lead in the execution of Azure cloud-based web development initiatives involving testing, deployment, project management duties; effectively collaborated with clients while providing mentorship to team members.
- Delivered strategic design and architectural mentorship, along with Azure technical expertise for assessments and POCs.
- Prepared design and project outline documents, encompassing list down the US's, use cases, user flows, data flow, data model, security measures, logging, notifications and reports.
- Managed diverse areas encompassing HR benefits, payroll, compliance, and banking.
- **.Net + Azure Integration work:**
 - Successfully reduced web API call expenses by **20%** by implementing APIM.
 - Upgraded **Azure front doors** from classic to premium SKU.
 - Handled the application DDOS standards in the FD's.
 - Streamlined the migration process of **ADAL to MSAL**, resulting in increased efficiency and productivity.
 - Leveraged **managed identity** to perform resource authentication, eliminating the need for maintaining secrets.
 - Achieved seamless migration from asp.net to .net 8/9.
- Skillfully addressed **accessibility non-compliance** issues and ensured timely resolution.
- Design and implementation of React components and libraries using SharePoint Framework (SPFx).
- Worked on the Definition of Done (DOD) for existing application.
- Conducted portfolio-wide candidate assessments.
- Streamlined build process by converting **Azure classic CI/CD** pipelines to yaml format and implementing code ql task for code scanning.
- Enhanced problem-solving by assisting colleagues with troubleshooting in application blockers, issues, and bugs. Provided user story clarification and technical guidance to improve overall performance.
