New Look, New Purpose

ACCORDING TO AYURVEDA

Water stored overnight in copper drinkware is beneficial for hemoglobin synthesis, bone strength, and immunity building. The water stored in copper makes the water "IONIC" that helps to maintain the body's Ph balance (Acid-Alkaline) & is also known as TAMRAJAL. Ayurveda reckons copper bottle water to balance all the Three doshas (Body Humors-Kapha, Vata & Pitta). Copper is an Antioxidant and anti-carcinogenic that prevents cell damage and slow aging. Copper has primary elements to produce Melanin (pigmentation of eyes, hair & skin) in the human body. Copper helps in regulating obesity & helps in regulating thyroid glands.

75% of the human body is made up of water. Our ancestors and even our grandmothers followed the practice of storing water in containers made of copper, which helps in stomach issues with cardiovascular problems.

Copper is a good tonic for the liver, spleen, and lymphatic system and helps in curing anemia.
